

Reson8 Platform — Sub-Feature Tables with Descriptions

All Five Modules

Module 1 — ORA Elections

#	Feature Group	Feature Name	Description
1	Election System Setup	Election Type Configuration	Define the type of election: Presidential · Senate · Parliamentary · Local / Municipal · Referendum — each type loads its own data model and rules
2	Election System Setup	Round Configuration	Set up single or multi-round structure · define advancement rules · configure runoff conditions
3	Election System Setup	Electoral Calendar	Full timeline of election events · registration deadlines · campaign periods · poll open/close

#	Feature Group	Feature Name	Description
			times · results announcement schedule
4	Election System Setup	Candidate Database	Register all candidates: name · party · district · photo · biography · national ID · social handles
5	Election System Setup	Party Database	Register all parties: official name · colours · symbol · acronym · leadership · founding date · ideology
6	Election System Setup	Constituency Mapping	Configure geographic districts: boundaries · seat allocation · parent-child region hierarchy · population data
7	Election System Setup	Seat Configuration	Define total seats available · majority threshold · proportional vs. first-past-the-post rules · quota rules
8	Election System Setup	Results Feed Integration	Connect official results API or data feed · field mapping · validation rules · feed health monitoring · fallback feed

#	Feature Group	Feature Name	Description
9	Election System Setup	Alert Threshold Setup	Configure triggers: majority achieved · seat milestone · % precincts reporting · concession language detected
10	Election System Setup	Vizrt Template Assignment	Map election data fields to pre-built Vizrt scenes · bind candidate colours · assign constituency to map layer
11	Live Results	Real-Time Vote Count	Live vote tally per candidate per constituency · percentage and absolute numbers · updates continuously as results are reported
12	Live Results	Seat Tally	Running count of seats won and projected per party · majority threshold line displayed · updates after each result
13	Live Results	Lead / Trail Indicators	Live ranking of candidates per constituency · gain/loss markers vs. previous election ·

#	Feature Group	Feature Name	Description
14	Live Results	Results by Constituency	colour-coded by party Drill-down from national aggregate to province to individual district · sortable by margin · party · swing
15	Live Results	Progressive Update	% of precincts reporting · estimated time to full results · confidence indicator per result
16	Live Results	Results Validation	Anomaly detection on incoming data · flags statistical jumps before they enter editorial queue · requires editor confirmation
17	Live Results	Comparative Results	Side-by-side current vs. previous election result per constituency · % swing · absolute vote change
18	Interactive Map	Country Map	National geographic map colour-filled by winning candidate or party · live update as results arrive

#	Feature Group	Feature Name	Description
19	Interactive Map	District / State Drill-Down	Click through from national to regional to district level · breadcrumb navigation · back to parent level
20	Interactive Map	Candidate Performance Layer	Overlay showing each candidate's vote share geographically · filterable per candidate
21	Interactive Map	Swing Visualization	Direction and magnitude of swing vs. previous election per district · arrow or colour-scale display
22	Interactive Map	Poll Close Tracker	Show which areas have closed polls and which are still open · greyed out until results begin
23	Interactive Map	Historical Data Overlay	Layer previous election results over current map · compare cycles side by side
24	Interactive Map	Sorting & Filtering	Filter map by party · region · swing direction · margin of victory · turnout
25	Interactive Map	Battleground Watch	Highlight closely contested

#	Feature Group	Feature Name	Description
26	Entity Profiles	Candidate Profile Card	constituencies in real time · margin threshold configurable Full profile: photo · name · party · district · age · biography · current position held
27	Entity Profiles	Historical Record	Prior electoral history · previous positions held · political career timeline · notable votes
28	Entity Profiles	Policy Positions	AI-extracted policy stances on key issues from public statements · speeches · manifestos
29	Entity Profiles	Related News	Live news feed filtered to this candidate from all monitored sources · sentiment-tagged
30	Entity Profiles	Social Trends	Candidate social media volume · engagement trends · sentiment direction over campaign period
31	Entity Profiles	Entity Mapping	Relationship graph showing connections to other political

#	Feature Group	Feature Name	Description
32	Election Preparations	Campaign Activity Tracker	figures · organisations · donors · media Monitor campaign events · rallies · advertising activity · media appearances
33	Election Preparations	Swing Districts / States	Pre-identified battleground areas with historical context · current polling · risk level
34	Election Preparations	Key City Monitoring	Enhanced monitoring for politically significant cities and capitals during campaign period
35	Election Preparations	Scheduled Visits & Events	Calendar of candidate appearances · campaign stops · debates · press conferences
36	Election Preparations	Polling Data Integration	Pre-election polls ingested with source · methodology · date · sample size · margin of error
37	Coalition & Alliances	Live Coalition Updates	Real-time tracking of party alliance announcements and changes · source-attributed

#	Feature Group	Feature Name	Description
38	Coalition & Alliances	Seat Mathematics Simulator	Calculate which party combinations reach majority threshold · updates live as results arrive
39	Coalition & Alliances	Promises Tracker	Track coalition agreements · policy commitments made during alliance negotiations
40	Coalition & Alliances	Organisation & Company Backing	Track corporate and institutional endorsements · political donor affiliations
41	Coalition & Alliances	Local & Global Context	International coalition comparisons · historical precedents from previous elections
42	Achievements & Track Record	Economic	Policy delivery in economic domain: GDP growth · unemployment · investment · trade agreements
43	Achievements & Track Record	Social	Healthcare · education · housing · welfare delivery record during term
44	Achievements & Track Record	Political	Legislative record · cross-party

#	Feature Group	Feature Name	Description
45	Achievements & Track Record	Military & Security	cooperation · reform delivery · campaign promise fulfilment Defence and security-related decisions · outcomes · international commitments
46	Achievements & Track Record	Education	Specific education policy delivery · literacy rates · school building · curriculum reform
47	Achievements & Track Record	Industrial	Infrastructure projects · industrial policy · development programs delivered
48	AI Prediction Engine	Win Probability	Real-time probability of winning per candidate / party · updates as results arrive · confidence range shown
49	AI Prediction Engine	Seat Projection	Projected final seat count per party based on results pattern so far · range displayed
50	AI Prediction Engine	Turnout Intelligence	Projected final voter turnout based on early reporting ·

#	Feature Group	Feature Name	Description
51	AI Prediction Engine	Swing Prediction	historical comparison Predicted swing direction and magnitude per region · based on live results pattern
52	AI Prediction Engine	Called Race Signal	AI signals when a race is statistically determined · editor confirms before any on-air call
53	Social Intelligence	Candidate Sentiment Comparison	Side-by-side real-time sentiment per candidate across all monitored social platforms
54	Social Intelligence	Party Sentiment Trend	Sentiment direction and magnitude per party over time · 6-emotion breakdown available
55	Social Intelligence	Hashtag Volume Tracking	Top election hashtags ranked by volume · sentiment · velocity · language breakdown
56	Social Intelligence	Viral Claim Detection	Detects rapidly spreading unverified claims before they peak · flags for editorial review
57			

#	Feature Group	Feature Name	Description
	Social Intelligence	Public Mood Analysis	Aggregate emotion across all election social discourse · overall public sentiment direction
58	Breaking News	Elections Breaking Feed	Dedicated breaking stream filtered to election content only · AI-classified by severity
59	Breaking News	Results Threshold Alert	Auto-alert when result crosses configured milestone: majority · seat target · lead change
60	Breaking News	Concession / Victory Detection	NLP detects concession or victory language in candidate public statements · real-time
61	Breaking News	Anomalous Results Alert	Flags statistically anomalous data before it reaches editorial queue · hold for review
62	AI Content Generation	Auto-Generated Headline	AI drafts broadcast headline from live results data · character-limit aware · editor reviews
63	AI Content Generation	Lower-Third Caption	AI generates lower-third text

#	Feature Group	Feature Name	Description
			per graphic type · styled to template · bilingual
64	AI Content Generation	Anchor Talking Points	AI generates contextual talking points per result or graphic · refreshed as data changes
65	AI Content Generation	AI News List	AI-assembled prioritised list of election news items for anchor reference during broadcast
66	AI Content Generation	Bilingual Output	All generated text produced in Arabic and English simultaneously · RTL-aware
67	AI Content Generation	Urgency Calibration	Tone adjusts based on severity: called race vs. developing result vs. concession
68	Broadcast	Live Channel Monitoring	Monitor what competing channels are covering during the election broadcast
69	Broadcast	Narrative Tracking	Track which narratives competing networks are emphasising in their coverage
70	Broadcast		

#	Feature Group	Feature Name	Description
		Coverage Intelligence	See which stories competitors are leading with · editorial decision support
71	Broadcast	First-Mover Detection	Identify which channel broke a story first · competitive awareness
72	Programs	AI Program Rundown	AI-generated show rundown for election night broadcast · segment by segment
73	Programs	Pre-Election Show Package	Briefing and content package for pre-election programming the day before
74	Programs	Bulletin Script	AI-generated election news bulletin script · structured with headlines · context · updates
75	Programs	Customized Segment List	Tailored content list per show format and duration · anchor-specific
76	Take to Air	Multi-Selection	Select multiple graphics to queue simultaneously · batch approval workflow
77	Take to Air	Preview Before Air	See exact graphic as it will appear on

#	Feature Group	Feature Name	Description
78	Take to Air	Producer → Editor → Operator	screen before taking · no surprises on air Full three-step editorial approval workflow · no graphic bypasses the chain
79	Take to Air	Reject & Revise	Editor rejects with inline comment · returns to producer for revision · re-submission loop
80	Take to Air	Editorial Audit Trail	Immutable log of every action: who prepared · who approved · when taken · what aired
81	Control Room	Material Approval	Final editorial sign-off before any content goes on air · visible approval status
82	Control Room	Live On-Air Status	Real-time view of what is currently broadcasting across all output screens
83	Control Room	Multi-Screen Management	Control graphics across multiple output screens simultaneously · per-screen assignment
84	Control Room	Emergency Override	Instant pull of any live graphic

#	Feature Group	Feature Name	Description
85	Control Room	Broadcast Event Log	by senior editor · logged with reason Complete log of everything that went on air: timestamp · operator · graphic · module

Module 2 — ARENA Sports

#	Feature Group	Feature Name	Description
1	Sport Type	Sport Selector	Choose active sport: Football · Basketball · Tennis · Formula 1 · Cricket · Combat Sports · Golf · Athletics · sport type loads correct data model · stats · templates · feed
2	Sport Type	Data Model Loader	Each sport type activates its own event library · statistics set · Vizrt template collection · data feed configuration
3	Sport Type	Multi-Sport Mode	Run multiple sports simultaneously during the same broadcast window · switch between active sports

#	Feature Group	Feature Name	Description
4	Competition Setup	Competition Configuration	Define competition: name · type (League / Cup / Tournament / Knockout) · season dates · number of teams · format
5	Competition Setup	Team Database	Register all clubs: name · official colours · badge · home ground · squad list · manager · founding year
6	Competition Setup	Player Database	Register all players: name · position · nationality · age · photo · shirt number · current club
7	Competition Setup	Match Schedule	Full fixture list · broadcast window per match · match day configuration · venue details
8	Competition Setup	Data Feed Integration	Connect official data provider: Opta · Stats Perform · league API · field mapping · feed health monitoring
9	Competition Setup	Vizrt Scene Assignment	Map match data fields to Vizrt scene containers · configure score bug · stats

#	Feature Group	Feature Name	Description
10	Competition Setup	Template Pre-Load	panels · event alerts All Vizrt scenes pre-bound before broadcast · zero technical setup during live match
11	Live Match	Live Score Display	Current score for both teams · continuously updated · venue · competition name · match day
12	Live Match	Match Clock	Live match minute · first / second half indicator · stoppage time display · kick-off reference
13	Live Match	Match Events	Goals · assists · bookings · red cards · substitutions · VAR decisions · penalties · each event triggers editorial queue automatically
14	Live Match	Event Threshold Alert	Configurable alert on key events: goal · red card · penalty · VAR reversal · fires to editorial queue
15	Live Match	Half-Time / Full-Time Trigger	Auto-trigger for interval and final whistle · loads summary

#	Feature Group	Feature Name	Description
16	Live Match	Event Validation	graphic into editorial queue Cross-check incoming event data against expected patterns before entering editorial queue · flag anomalies
17	Match Statistics	Possession	Live possession % per team · updates every 30 seconds · displayed as running average
18	Match Statistics	Shots	Shots on target · shots off target · blocked shots · shot accuracy % per team
19	Match Statistics	Expected Goals (xG)	Live cumulative xG per team · per player · quality of chances created indicator
20	Match Statistics	Pass Completion	Pass accuracy % per team · total passes attempted · key passes · long ball accuracy
21	Match Statistics	Defensive Stats	Fouls · offsides · corners · tackles won · interceptions · clearances per team
22	Match Statistics	Physical Stats	Distance covered · sprints · top speed per player · intensity

#	Feature Group	Feature Name	Description
23	Match Statistics	Saves	comparison between teams Goalkeeper saves · save % · distribution accuracy · shots faced
24	Formation & Tactical View	Live Formation Display	Real-time formation shape for both teams · updates when substitutions or tactical changes occur
25	Formation & Tactical View	Heat Map	Zones of play for each team and individual players · territorial dominance visualization
26	Formation & Tactical View	Shot Map	All shots plotted on pitch graphic · colour-coded by outcome · goal / saved / missed / blocked
27	Formation & Tactical View	Pass Network	Player-to-player pass connections displayed on pitch · line weight shows frequency
28	Formation & Tactical View	Tactical Shape Analysis	Defensive line height · pressing intensity · width of play · compactness indicators
29	Formation & Tactical View	Substitution Impact View	Before/after formation and stats

#	Feature Group	Feature Name	Description
30	Competition & Standings	League Table	comparison following a substitution Current standings: team · played · won · drawn · lost · goals for/against · points · live update
31	Competition & Standings	Form Guide	Last 5 results per team: W / D / L visual strip · home and away form split
32	Competition & Standings	Head-to-Head Record	All-time record between two teams · last 5 meetings · goals scored · venue breakdown
33	Competition & Standings	Top Scorers / Golden Boot	Live golden boot standings · goals · assists · penalties · updated after each goal
34	Competition & Standings	Title Race Calculator	Points needed to win title · games remaining · can any team catch the leader
35	Competition & Standings	Relegation Battle	Teams in danger zone · points above relegation · remaining fixtures difficulty
36	Competition & Standings	Qualification Scenarios	European / continental competition qualification

#	Feature Group	Feature Name	Description
37	Entity Profiles	Player Profile Card	mathematics · live calculation Photo · position · nationality · age · shirt number · current season stats summary Full season stats per player: goals · assists · appearances · cards · minutes played · rating
38	Entity Profiles	Season Statistics	Career timeline · clubs · seasons · statistics per club · career totals
39	Entity Profiles	Career History	Manager name · photo · tactical philosophy · win rate · career history · notable achievements
40	Entity Profiles	Manager Profile	Club badge · colours · home ground · current season record · recent form · squad value
41	Entity Profiles	Team Profile	Side-by-side stats comparison between two players · filterable by metric
42	Entity Profiles	Player Comparison Card	Official lineup once released · formation · player positions
43	Pre-Match Intelligence	Confirmed Starting Lineup	

#	Feature Group	Feature Name	Description
44	Pre-Match Intelligence	Injury & Suspension Report	· confirmed vs. predicted - Confirmed injuries · suspensions · doubtful players · expected return dates
45	Pre-Match Intelligence	Team News	Latest official club news: manager press conference · training updates · squad selection signals
46	Pre-Match Intelligence	Historical Head-to-Head	Detailed all-time record between teams · big wins · goalscorers · notable moments
47	Pre-Match Intelligence	Tactical Preview	Expected formation and approach · key matchups · danger players · set-piece record
48	Pre-Match Intelligence	Referee Profile	Referee assignment · cards per game average · penalty decisions · disciplinary record
49	Transfer & Squad Intelligence	Transfer Window Tracker	Live tracking of transfer activity: confirmed · negotiating · bid submitted · rejected
50		Confirmed Deals	

#	Feature Group	Feature Name	Description
	Transfer & Squad Intelligence		Verified transfers with fee · contract length · sell-on clauses where public
51	Transfer & Squad Intelligence	Credible Rumours	Transfer rumours from verified credible sources · source credibility score shown
52	Transfer & Squad Intelligence	Injury & Availability Tracker	Year-round injury monitoring · confirmed diagnosis · return timeline · squad impact
53	Transfer & Squad Intelligence	Squad Depth Analysis	Per-position squad depth · where reinforcements are needed · age profile
54	Transfer & Squad Intelligence	Contract Expiry Watch	Players entering final year of contract · free agent candidates · renewal status
55	Records & Achievements	Club All-Time Records	Goals scored · titles won · unbeaten runs · biggest wins · attendance records
56	Records & Achievements	Player Milestones	Approaching and achieved milestones: goals · appearances ·

#	Feature Group	Feature Name	Description
			assists · clean sheets
57	Records & Achievements	Season Bests	Best defensive record · most goals scored · longest winning run this season
58	Records & Achievements	Trophy History	Complete trophy cabinet with years · competitions · managers · key players
59	Records & Achievements	Derby Record	Historical record in local rivalry matches · recent form in derbies
60	AI Prediction Engine	Match Outcome Probability	Win / Draw / Loss % per team · pre-match and live during match · updates per minute
61	AI Prediction Engine	Live Win Probability Tracker	Probability trend chart across 90 minutes · shows impact of goals and red cards
62	AI Prediction Engine	Next Goal Probability	Which team is more likely to score next based on current performance metrics
63	AI Prediction Engine	Player Most Likely to Score	Individual scoring probability based on position · form · shots taken · xG
64			Most probable final scoreline ·

#	Feature Group	Feature Name	Description
	AI Prediction Engine	Scoreline Prediction	range of outcomes with probability
65	Social Intelligence	Fan Sentiment Per Team	Real-time social sentiment from fans of each team · compared side by side
66	Social Intelligence	Player Sentiment During Match	Individual player sentiment tracking: praise after a goal · criticism after a miss
67	Social Intelligence	Trending Match Hashtags	Top match hashtags by volume · sentiment · velocity · language breakdown
68	Social Intelligence	Viral Moment Detection	Detects match moments spreading rapidly on social before they peak · flags to editorial
69	Social Intelligence	Post-Event Fan Reaction	Aggregate social reaction immediately after full time · emotion breakdown
70	Breaking News	Sports Breaking Feed	Breaking stream filtered to sport: injuries · confirmed lineups · manager statements · results

#	Feature Group	Feature Name	Description
71	Breaking News	Transfer Alert	Confirmed transfer announcement detected from official club or journalist sources
72	Breaking News	Match Event Alert	Key in-match events: goal · red card · penalty · final whistle · fires to editorial queue
73	Breaking News	Manager Statement	Manager press conference and official statement detection · AI-summarised
74	Breaking News	Disciplinary News	Red card appeals · bans · FA charges · tribunal decisions
75	AI Content Generation	Match Headlines	Auto-generated broadcast headline from live match data · event-triggered
76	AI Content Generation	Lower-Third Captions	Caption per event type: goal flash · card · substitution · half-time score
77	AI Content Generation	Match Summary	Half-time and full-time AI-generated match summary · key moments · stats
78	AI Content Generation	Anchor Talking Points	Per-stat talking points for anchor: possession

#	Feature Group	Feature Name	Description
79	AI Content Generation	Bilingual Output	context · xG comparison · form reference All generated text in Arabic and English simultaneously · RTL-aware
80	Broadcast	Live Channel Monitoring	Monitor what competing sports channels are covering during the match window
81	Broadcast	Narrative Tracking	Track which storylines competitors are leading with: result · tactics · controversy
82	Broadcast	Coverage Intelligence	See which moments competitors are replaying and discussing
83	Programs	AI Match Preview Rundown	AI-generated show rundown for pre-match programme · segment by segment
84	Programs	Post-Match Analysis Script	AI-generated post-match analysis programme rundown · stats-driven narrative
85	Programs	Customized Segment List	Tailored content list per show format and duration · per presenter

#	Feature Group	Feature Name	Description
86	Take to Air	Multi-Selection	Select multiple graphics simultaneously · batch approval for half-time or full-time packages
87	Take to Air	Preview Before Air	See exact graphic on screen before taking · score bug · stats panel · event graphic
88	Take to Air	Producer → Editor → Operator	Full three-step editorial approval workflow for every graphic
89	Take to Air	Reject & Revise	Editor rejects with inline comment · returns to producer · revision loop
90	Take to Air	Editorial Audit Trail	Immutable log: who prepared · who approved · when taken · what aired
91	Control Room	Material Approval	Final editorial sign-off before any content goes on air
92	Control Room	Live On-Air Status	Real-time view of what is currently broadcasting: score bug · stats · event graphic
93	Control Room	Multi-Screen Management	Control graphics across multiple output screens · different

#	Feature Group	Feature Name	Description
			content per screen
94	Control Room	Emergency Override	Instant pull of any live graphic by senior editor
95	Control Room	Broadcast Event Log	Complete log of everything on air: timestamp · operator · graphic · match event

Module 3 — PULSE Finance & Markets

#	Feature Group	Feature Name	Description
1	Market Setup	Exchange Configuration	Register exchanges: name · timezone · trading hours · currency · index association
2	Market Setup	Instrument Database	Register all instruments: stocks · indices · commodities · FX pairs · crypto · bonds · ETFs
3	Market Setup	Data Feed Integration	Connect market data provider: Bloomberg · Reuters · exchange API · field mapping · feed health
4	Market Setup	Alert Threshold Configuration	Set % move triggers · circuit breaker alerts · volume spike

#	Feature Group	Feature Name	Description
			thresholds · index level alerts
5	Market Setup	Vizrt Template Assignment	Map market data fields to pre-built Vizrt scenes · ticker bar · price panel · index display
6	Market Setup	Market Calendar Setup	Configure scheduled events: earnings dates · rate decisions · economic data releases
7	Market Types	Equities	Stocks and shares: individual company securities traded on exchanges
8	Market Types	Fixed Income / Bonds	Government and corporate bonds · yield curves · credit ratings · duration
9	Market Types	Currencies / FX	Foreign exchange pairs: major · minor · exotic · cross rates · spot and forward
10	Market Types	Commodities	Energy (oil · gas) · Metals (gold · silver · copper) · Agriculture · Livestock
11	Market Types	Cryptocurrency	Bitcoin · Ethereum · top 10 by market cap · crypto

#	Feature Group	Feature Name	Description
			market overall sentiment
12	Market Types	Derivatives / Futures	Futures contracts · options · volatility instruments · open interest
13	Market Types	ETFs / Funds	Exchange-traded funds · sector funds · thematic · commodity-backed
14	Live Market Data	Live Price Display	Price · absolute change · % change · intraday range (high/low) · real-time per instrument
15	Live Market Data	Volume Indicator	Trading volume vs. average volume · abnormal volume flag · volume trend
16	Live Market Data	Market Status Indicator	Open / Pre-market / After-hours / Closed per exchange · countdown to open/close
17	Live Market Data	Bid / Ask Spread	Live bid and ask price · spread width · liquidity indicator per instrument
18	Live Market Data	Last Trade Time	Timestamp of most recent trade · useful for thinly traded instruments

#	Feature Group	Feature Name	Description
19	Indices & Benchmarks	Major Global Indices	S&P 500 · FTSE 100 · DAX · Nikkei 225 · CAC 40 · Hang Seng · live level · change · %
20	Indices & Benchmarks	Regional Indices	Local market benchmark indices per configured region · live performance
21	Indices & Benchmarks	Sector Indices	Technology · Energy · Healthcare · Financial · Consumer sector index performance
22	Indices & Benchmarks	Index Performance Comparison	Side-by-side comparison of multiple indices · YTD · 1-month · 1-week performance
23	Indices & Benchmarks	52-Week Range	Current price vs. 52-week high and low per index · where are we in the range
24	Currencies & Commodities	FX Major Pairs	EUR/USD · GBP/USD · USD/JPY · USD/CHF · live rates · daily change · trend
25	Currencies & Commodities	Cross Rates	Non-USD pairs · regional currency pairs · configurable per broadcast market
26		Oil Prices	

#	Feature Group	Feature Name	Description
			Brent crude · WTI crude · live price · daily change · % move · production context
27	Currencies & Commodities	Precious Metals	Gold · silver · platinum · palladium · spot price · daily range · YTD
28	Currencies & Commodities	Other Commodities	Natural gas · copper · wheat · corn · coffee · configurable per broadcast focus
29	Currencies & Commodities	Cryptocurrency	Bitcoin · Ethereum · top 10 · market cap · 24h change · dominance %
30	Gainers & Losers	Top Gainers	Biggest % movers upward · filterable by exchange · sector · time period
31	Gainers & Losers	Top Losers	Biggest % movers downward · filterable by exchange · sector · time period
32	Gainers & Losers	Volume Leaders	Most traded instruments by volume · unusual activity flag
33	Gainers & Losers	52-Week Highs & Lows	Instruments hitting new yearly extremes

#	Feature Group	Feature Name	Description
34	Gainers & Losers	Sector Heat Map	· bullish/bearish signal - All sectors colour-coded by % performance · instant market overview
35	Economic Calendar	Scheduled Events	Interest rate decisions · GDP releases · inflation data · employment figures · PMI
36	Economic Calendar	Earnings Announcements	Company earnings release dates · EPS estimate · revenue estimate · analyst consensus
37	Economic Calendar	IPO Calendar	Upcoming listings · expected price range · sector · exchange
38	Economic Calendar	Central Bank Meetings	Fed · ECB · BoE · BoJ meeting dates · expected decision · market consensus
39	Economic Calendar	Expected vs. Actual	When data releases: expected figure · actual figure · previous figure · beat/miss indicator
40	Market Events	Market Open / Close Trigger	Auto-alert and graphic trigger at each configured

#	Feature Group	Feature Name	Description
41	Market Events	Circuit Breaker Alert	exchange open and close time Market-wide trading halt triggered · severity level · duration · affected exchanges
42	Market Events	Earnings Release	Company earnings published · EPS beat/miss vs. estimate · revenue beat/miss · market reaction
43	Market Events	Rate Decision Announcement	Central bank rate decision detected · decision vs. expectation · statement summary
44	Market Events	Flash Crash Detection	Sudden abnormal price move detected · flag before editorial acts on it
45	Market Events	Regulatory / Government Action	Sanctions · trading restrictions · government intervention detected in market
46	Entity Profiles	Company Profile Card	Name · ticker · sector · current price · market cap · P/E ratio · 52-week range · exchange

#	Feature Group	Feature Name	Description
47	Entity Profiles	Index Profile Card	Index name · methodology · component count · current level · daily range · YTD
48	Entity Profiles	Central Bank Profile	Institution · governor · meeting schedule · recent decisions · current policy rate
49	Entity Profiles	CEO / Executive Profile	Executive name · photo · role · company · recent statements · market-moving history
50	Entity Profiles	Competitor Comparison	Side-by-side company comparison: price · market cap · P/E · revenue · YTD performance
51	AI Analysis Engine	Market Sentiment Score	Composite score combining social signal · news tone · price momentum per instrument
52	AI Analysis Engine	Trend Direction Signal	Bull/bear signal per instrument or sector · momentum direction · strength indicator
53	AI Analysis Engine	Sector Rotation Analysis	Capital flow between sectors · which sectors

#	Feature Group	Feature Name	Description
54	AI Analysis Engine	Volatility Analysis	gaining/losing institutional interest VIX and instrument-level volatility · elevated vs. normal · historical comparison
55	AI Analysis Engine	Post-Event Impact Analysis	Immediate market reaction analysis after rate decision · earnings · economic data
56	Social Intelligence	Trending Tickers	Most discussed stocks/ instruments on social media · volume · sentiment
57	Social Intelligence	Investor Sentiment Per Instrument	Bullish/bearish sentiment per ticker from social and news · retail vs. institutional signal
58	Social Intelligence	Viral Financial Claim Detection	Detect rapidly spreading financial claims before they peak · fact-check flag
59	Social Intelligence	Social Momentum Tracker	Social signal accelerating around an instrument before price moves · early signal
60	Breaking News	Financial Breaking Feed	Breaking stream: earnings

#	Feature Group	Feature Name	Description
61	Breaking News	Market Threshold Alert	surprises · rate decisions · regulatory action · company announcements Alert when price or index crosses configured % move · volume spike alert
62	Breaking News	Earnings Surprise Alert	EPS or revenue significantly beats or misses expectation · immediate flag
63	Breaking News	Geopolitical Market Impact	Political or conflict event detected with known market impact · cross-module signal
64	AI Content Generation	Market Headlines	Auto-generated headline from live market data · move-triggered · editor reviews
65	AI Content Generation	Lower-Third Captions	Price move captions · index level · rate decision result · earnings beat/miss
66	AI Content Generation	Market Open / Close Summary	AI-generated opening and closing market summary · key movers · tone
67	AI Content Generation	Anchor Talking Points	Contextual talking points per market move: sector context ·

#	Feature Group	Feature Name	Description
			historical comparison
68	AI Content Generation	Bilingual Output	All generated text in Arabic and English simultaneously
69	Broadcast	Financial Channel Monitoring	Monitor what Bloomberg TV · CNBC · Reuters TV are covering
70	Broadcast	Narrative Tracking	Which market stories competitors are leading with · editorial positioning intelligence
71	Programs	Pre-Market Show Rundown	AI-generated pre-market programme rundown · what to watch · key events today
72	Programs	Closing Bell Summary	AI-generated end-of-day market summary script · winners · losers · key moves
73	Programs	Weekly Market Review	AI-assembled weekly performance review · narrative · key chart moments
74	Programs	Customized Segment List	Tailored content list per show format · per anchor · per broadcast duration
75	Take to Air	Multi-Selection	Select multiple market graphics

#	Feature Group	Feature Name	Description
			simultaneously · price panel · index · ticker
76	Take to Air	Preview Before Air	See exact graphic before taking: price panel · index display · ticker bar
77	Take to Air	Producer → Editor → Operator	Full three-step editorial approval for every graphic
78	Take to Air	Reject & Revise	Editor rejects with comment · returns to producer · revision loop
79	Take to Air	Editorial Audit Trail	Immutable log: who prepared · who approved · when taken · what aired
80	Control Room	Material Approval	Final editorial sign-off before any content goes on air
81	Control Room	Live On-Air Status	Real-time view of what is currently broadcasting: ticker · price panel · index
82	Control Room	Multi-Screen Management	Control graphics across multiple output screens · ticker on one · price on another
83	Control Room	Emergency Override	Instant pull of any live graphic in case of data error or

#	Feature Group	Feature Name	Description
84	Control Room	Broadcast Event Log	breaking development Complete log of everything on air: timestamp · operator · instrument · graphic

Module 4 — ATMOS Weather & Natural Disasters

#	Feature Group	Feature Name	Description
1	Weather Setup	Coverage Area Configuration	Define cities · regions · countries · priority locations · broadcast geography scope
2	Weather Setup	Location Database	Register all locations with coordinates · timezone · elevation · region hierarchy
3	Weather Setup	Data Feed Integration	Connect weather API: Tomorrow.io · AccuWeather · national met service · field mapping
4	Weather Setup	Alert Threshold Configuration	Set severe weather thresholds: storm · extreme heat/cold ·

#	Feature Group	Feature Name	Description
5	Weather Setup	Vizrt Scene Assignment	rainfall · wind · visibility Map weather data fields to Vizrt scenes · conditions card · forecast · map · alert
6	Weather Setup	Featured Cities Selection	Configure priority cities for headline display · ordered by editorial preference
7	Weather Phenomena	Standard Conditions	Clear · partly cloudy · cloudy · overcast · light rain · drizzle · fog
8	Weather Phenomena	Storms & Thunderstorms	Thunderstorm · severe thunderstorm · electrical storm · hail · heavy rain
9	Weather Phenomena	Extreme Heat / Cold	Heatwave · extreme cold · frost · freeze warning · heat dome events
10	Weather Phenomena	Sandstorms	Sandstorm · dust storm · haboob · visibility reduction · air quality impact
11	Weather Phenomena	Tropical Systems	Hurricane · typhoon · cyclone · tropical storm · category classification · path
12	Weather Phenomena	Winter Events	Snow · blizzard · ice storm ·

#	Feature Group	Feature Name	Description
13	Weather Phenomena	Flooding	freezing rain · avalanche risk Flash flood · river flood · coastal flood · storm surge · urban flooding
14	Weather Phenomena	High Wind Events	Gale · severe gale · storm force winds · wind advisory · infrastructure impact
15	Current Conditions	Temperature Display	Actual temperature · feels like · high/low for the day · unit configurable (°C/°F)
16	Current Conditions	Weather Description	Text and icon description of current conditions · localised terminology
17	Current Conditions	Wind	Speed · direction · gusts · Beaufort scale · compass direction display
18	Current Conditions	Humidity & Pressure	Relative humidity % · atmospheric pressure · rising/falling pressure trend
19	Current Conditions	UV Index	Current UV level · health advisory · scale 0–11+ · sun protection recommendation
20		Visibility	Current visibility distance ·

#	Feature Group	Feature Name	Description
	Current Conditions		reduced visibility flag · fog/haze cause
21	Current Conditions	Sunrise / Sunset	Today's sunrise and sunset times · day length · golden hour
22	Forecast	Hourly Forecast	24-hour granular forecast per location · temperature · conditions · precipitation %
23	Forecast	3-Day Forecast	Short-range outlook · high/low · conditions · precipitation probability · wind
24	Forecast	7-Day Forecast	Weekly outlook · general conditions · temperature trend · weekend weather
25	Forecast	10-Day Extended Outlook	Beyond-7-day forecast · confidence level shown · trend direction
26	Forecast	Precipitation Probability	% chance of rain/snow per period · expected accumulation · timing
27	Weather Maps	Temperature Map	Geographic temperature overlay across coverage area · colour-scaled gradient
28	Weather Maps		Rain accumulation

#	Feature Group	Feature Name	Description
		Rainfall / Precipitation Map	overlay · intensity zones · real-time and forecast
29	Weather Maps	Wind Map	Wind speed and direction vectors · animated movement · high-wind zones
30	Weather Maps	Pressure Map	Isobar display · high/low pressure systems · front tracking
31	Weather Maps	Cloud Cover Map	Satellite-based cloud coverage overlay · clear vs. overcast zones
32	Weather Maps	UV Index Map	Geographic UV distribution · dangerous exposure zones · daily peak time
33	Weather Maps	Snow Coverage Map	Snow depth overlay · snowfall accumulation · snow line elevation
34	Weather Maps	Animated Overlays	Animated cloud movement · rain progression · storm tracking · time-lapse mode
35	Severe Weather	Active Warnings Display	All active warnings and watches from national met authorities · severity · affected areas
36	Severe Weather	Storm Tracking	Hurricane/ cyclone path

#	Feature Group	Feature Name	Description
			tracker · current position · projected landfall · intensity
37	Severe Weather	Flood Alerts	River level monitoring · flood watch/warning · expected peak · affected areas
38	Severe Weather	Heatwave Alerts	Multi-day extreme heat event · health risk · duration · affected population
39	Severe Weather	Wildfire Risk Index	Fire weather conditions: wind · humidity · temperature · drought index · risk rating
40	Severe Weather	Severe Weather Timeline	Chronological timeline of an ongoing severe event · updates as situation evolves
41	Natural Disasters	Earthquake Detection	Seismic event detection from USGS/EMSC · magnitude · depth · epicentre · tsunami potential
42	Natural Disasters	Tsunami Alert	Tsunami warning detection · wave height estimate · affected coastlines · arrival time

#	Feature Group	Feature Name	Description
43	Natural Disasters	Volcanic Activity	Eruption detection · ash cloud tracking · aviation impact · exclusion zones
44	Natural Disasters	Disaster Impact Area	Geographic overlay of affected area · population at risk · infrastructure impact
45	Natural Disasters	International Alert Feeds	GDACS · UN OCHA · national disaster management agency feeds integrated
46	Location Profiles	Per-City Weather Card	City name · current conditions · today's high/low · 3-day summary · wind · humidity
47	Location Profiles	Featured Cities Display	Priority city cards displayed in editorial-configured order · instant overview
48	Location Profiles	Regional Summary	Aggregate conditions for a region: e.g. Northern Europe · Gulf region · Mediterranean
49	Location Profiles	Country Overview	National weather summary · most extreme condition · alerts active

#	Feature Group	Feature Name	Description
50	Climate & Seasonal Context	Historical Average Comparison	Current conditions vs. historical average for same date · above/ below normal
51	Climate & Seasonal Context	Seasonal Outlook	Seasonal forecast from met authorities · temperature and precipitation outlook
52	Climate & Seasonal Context	Climate Anomaly Detection	Significant departure from long-term normal · record event flag
53	Climate & Seasonal Context	Record Temperatures	All-time and seasonal record highs and lows · broken today flag
54	Breaking News	Severe Weather Breaking Alert	Auto-alert when national met authority issues a severe weather warning · fires to editorial
55	Breaking News	Natural Disaster Alert	Earthquake · tsunami · volcanic eruption detected · immediate flag to editorial queue
56	Breaking News	Disaster Escalation Signal	Ongoing event escalating: storm intensifies · flood levels rising · aftershock detected

#	Feature Group	Feature Name	Description
57	Breaking News	Weather Alert Editorial Queue	All severe events enter editorial queue for editor confirmation before any graphic goes to air
58	AI Content Generation	Weather Headlines	Auto-generated headline per city or region · severity-aware · editor reviews
59	AI Content Generation	Forecast Captions	Lower-third text for forecast graphic · conditions · temperature · precipitation
60	AI Content Generation	Severe Weather Copy	Alert-specific broadcast copy: storm name · affected areas · safety advisory
61	AI Content Generation	Anchor Talking Points	Contextual talking points: historical comparison · why this matters · what to watch
62	AI Content Generation	Bilingual Output	All generated text in Arabic and English simultaneously · RTL-aware
63	Broadcast	Weather Channel Monitoring	Monitor what competing channels are covering: storm · heatwave · disaster
64	Broadcast	Narrative Tracking	Which weather stories competitors are

#	Feature Group	Feature Name	Description
65	Programs	Morning Forecast Script	leading with · editorial positioning AI-generated daily weather show rundown · city by city · severe alerts first
66	Programs	Severe Weather Special	AI-generated special programme rundown for major weather or disaster event
67	Programs	Weekly Outlook Summary	AI-assembled weekly weather summary · narrative · key events · weekend outlook
68	Programs	Customized Segment List	Tailored content list per show format · per presenter · per broadcast region
69	Take to Air	Multi-Selection	Select multiple weather graphics simultaneously · city cards · map · forecast
70	Take to Air	Preview Before Air	See exact graphic before taking · map overlay · conditions card · forecast panel
71	Take to Air	Producer → Editor → Operator	Full three-step editorial approval for every graphic
72	Take to Air	Reject & Revise	Editor rejects with comment ·

#	Feature Group	Feature Name	Description
73	Take to Air	Editorial Audit Trail	returns to producer · revision loop Immutable log: who prepared · who approved · when taken · what aired
74	Control Room	Material Approval	Final editorial sign-off before any content goes on air
75	Control Room	Live On-Air Status	Real-time view of what is broadcasting: conditions card · map · alert overlay
76	Control Room	Multi-Screen Management	Control graphics across multiple output screens · map on one · city cards on another
77	Control Room	Emergency Override	Instant pull of any live graphic · critical for incorrect severe weather information
78	Control Room	Broadcast Event Log	Complete log of everything on air: timestamp · operator · location · graphic

Module 5 — FLASH Breaking News

#	Feature Group	Feature Name	Description
1	Source Configuration	Source Categories	Define monitored source types: news wires · social platforms · official government feeds · agency feeds
2	Source Configuration	Topic & Keyword Monitoring	Configure keywords and topic clusters that activate the breaking detection pipeline
3	Source Configuration	Geographic Coverage	Define regions and countries in scope for breaking detection · global or filtered
4	Source Configuration	Language Filters	Select active languages from the 10 approved: English · Arabic · French · Spanish · Russian · Chinese · German · Portuguese · Persian · Turkish
5	Source Configuration	Trusted Source Whitelist	Designate high-trust sources whose content is fast-tracked through verification
6	Source Configuration	Blocked Source List	Exclude known unreliable or

#	Feature Group	Feature Name	Description
7	Breaking Detection & Alert Queue	Real-Time Event Classification	spam sources from the detection pipeline AI classifies breaking events across all 10 languages simultaneously from social + wires
8	Breaking Detection & Alert Queue	Multi-Source Aggregation	Social signal + news wire + broadcast source triangulated per story before alerting
9	Breaking Detection & Alert Queue	Severity Classification	Each detected story auto-tagged: Major Breaking · Breaking · Developing · priority colour-coded
10	Breaking Detection & Alert Queue	Geographic Tagging	Location of breaking event identified: city · country · region · coordinates
11	Breaking Detection & Alert Queue	First-Source Attribution	Identifies which source first reported the story · timestamp · platform
12	Breaking Detection & Alert Queue	Live Alert Queue	All detected breaking items displayed in editorial queue · severity-sorted · time-stamped
13			

#	Feature Group	Feature Name	Description
	Breaking Detection & Alert Queue	Unread / Acknowledged Status	Editor marks items as seen · queue clears as editors act · unread count visible
14	Breaking Detection & Alert Queue	Age of Story Indicator	Time elapsed since detection · helps editors prioritise freshest stories
15	Breaking Detection & Alert Queue	Story Assignment	Assign a breaking story to a specific editor for ownership and follow-through
16	Verification Engine	Cross-Source Verification	Story confirmed when detected across multiple independent sources · source count shown
17	Verification Engine	Source Credibility Score	Each source scored for reliability · high-credibility sources boost confidence faster
18	Verification Engine	Confidence Level Display	Visual confidence indicator per story: Unverified · Low · Medium · High · Confirmed
19	Verification Engine	Unverified Flag	Clear visual flag on any story not yet cross-verified · editors cannot miss it
20			

#	Feature Group	Feature Name	Description
			Configurable minimum number of independent sources before alert fires to editorial
21	Verification Engine	Minimum Source Threshold	
	Verification Engine	Rumour vs. Confirmed Distinction	Clear separation between circulating rumour and verified confirmed story
22	Verification Engine	Official Source Priority	Statements from governments · agencies · official bodies fast-tracked as confirmed
23	Topic Classification	Politics	Government decisions · elections (outside ORA) · international relations · diplomacy
24	Topic Classification	Sports	Breaking sports news: results · injuries · transfers · disciplinary · outside scheduled matches
25	Topic Classification	Finance	Market events · company news · economic data · outside scheduled PULSE coverage
26	Topic Classification	Weather & Disasters	Severe weather alerts · natural disasters ·

#	Feature Group	Feature Name	Description
27	Topic Classification	World	outside ATMOS scheduled coverage International events · conflicts · humanitarian situations · global developments
28	Topic Classification	Technology	Major tech announcements · cybersecurity incidents · product launches · outages
29	Topic Classification	Crime	Major criminal events · arrests · court decisions · security incidents
30	Topic Classification	Health	Disease outbreaks · medical breakthroughs · public health emergencies
31	Topic Classification	Priority Ranking	Each topic assigned a priority weight · configurable per editorial policy
32	Topic Classification	Editor Topic Filter	Each editor sees only their assigned topics · reduces noise · increases focus
33	Story Intelligence	Story Profile	Structured summary: what happened · who is involved ·

#	Feature Group	Feature Name	Description
34	Story Intelligence	Related Entities	where · when · why it matters Persons · organisations · locations automatically linked to the story
35	Story Intelligence	Background Context	AI-assembled background: who are the key actors · what is the history · why this matters now Has this happened before · when · what was the outcome · links to archived stories
36	Story Intelligence	Historical Precedent	AI-extracted direct quotes from key figures in the story · source-attributed
37	Story Intelligence	Key Quotes	Government · institution · person official statements detected and attached to story
38	Story Intelligence	Official Statements	All updates to a story collected in a single chronological thread · nothing gets lost
39	Story Development Tracker	Developing Story Thread	Full timeline of how the story developed: first
40	Story Development Tracker	Update History Timeline	

#	Feature Group	Feature Name	Description
41	Story Development Tracker	Story Escalation Signal	detection · verification · updates · resolution Automatic signal when a Developing story escalates to Breaking or Major Breaking
42	Story Development Tracker	Story De-Escalation	Signal when a story is confirmed to be less significant than initially detected
43	Story Development Tracker	Social Reaction Thread	How public and social media are responding · integrated into story thread as it develops
44	Story Development Tracker	Story Resolution / Closure	Editor closes a story when it is resolved · archived with full timeline
45	AI Analysis Engine	Story Impact Assessment	AI scores each story by potential reach · audience relevance · geopolitical significance
46	AI Analysis Engine	Market Impact Signal	Cross-module signal: does this breaking story have financial market implications
47	AI Analysis Engine	Political Escalation Probability	Does this story have the potential to

#	Feature Group	Feature Name	Description
48	AI Analysis Engine	Follow-Up Story Prediction	escalate into a larger political event What related stories are likely to follow · helps editorial team prepare
49	AI Analysis Engine	Related Story Clustering	Groups related breaking items into one story thread automatically · reduces duplication
50	AI Content Generation	Breaking Headline	Auto-generated breaking headline · urgency-calibrated · Major Breaking vs. Developing tone
51	AI Content Generation	Flash Overlay Copy	Text for full-screen or partial overlay graphic · punchy · short · verified facts only
52	AI Content Generation	Ticker Text	Scroll ticker copy from confirmed breaking stories · character-limited · clear
53	AI Content Generation	Anchor Talking Points	What the anchor needs to say: who · what · where · why it matters · what to watch next
54	AI Content Generation	Story Summary	3–5 sentence summary of

#	Feature Group	Feature Name	Description
			confirmed facts · used for bulletin or handover briefing
55	AI Content Generation	Bilingual Output	All generated text in Arabic and English simultaneously · urgency tone preserved
56	Take to Air	Multi-Selection	Select multiple breaking graphics simultaneously: ticker · flash overlay · alert card
57	Take to Air	Preview Before Air	See exact graphic before taking · especially critical for breaking: verify text is correct
58	Take to Air	Breaking Confirmation Workflow	Editor explicitly confirms story before any graphic goes to air · no automated take
59	Take to Air	Reject & Revise	Editor rejects AI-generated copy with comment · producer revises · re-submits
60	Take to Air	Editorial Audit Trail	Immutable log: source detected · who verified · who approved · when taken · what aired
61	Control Room		

#	Feature Group	Feature Name	Description
		Material Approval	Final editor sign-off · for breaking news this step is never skipped
62	Control Room	Live On-Air Status	What is currently on air: ticker · flash overlay · developing banner
63	Control Room	Multi-Screen Management	Breaking ticker on one screen · flash overlay on another · developing banner on a third
64	Control Room	Emergency Override	Instant pull of any live graphic · critical if a breaking story turns out to be false
65	Control Room	Broadcast Event Log	Complete log of everything on air: timestamp · operator · story · graphic type

Feature Count Summary

Module	Feature Groups	Sub-Features
